B&Co Smokeless BBQ Grill

The B&Co smokeless AI Fresco grill is the next innovation in charcoal cooking. Ready to start cooking for up to 6 people in under five minutes, the grill offers all the taste and flavour of traditional charcoal BBQ cooking without the timely set-up.

Zipped storage bag

FEATURES:

- Needs no electricity or gas
- Ready to cook in under 5 minutes (up to 30 minutes for traditional charcoal BBQ's)
- 250g of charcoal offers 40-100+ minutes cooking time (using up to 85% less charcoal than conventional BBQ's)
- Battery or USB operated airflow system, giving control of the heat intensity
- Cast iron 'skillet' style grill plate, offering great heat retention and easy clean
- The stainless steel drip tray is easy to clean due to the removable grill plate charcoal chamber and ignition plate
- Dishwasher safe
- Supplied with its own carry bag for easy storage

Squeeze Bottle Lighter Gel

An eco-friendly, clean lighting fuel for the B&Co Smokeless grill. Simply squeeze the gel in to the ignition tray and light with a match or lighter. Place the charcoal chamber over the lit gel, turn up the fan on the grill to fully ignite the charcoal and you're ready to start cooking in under 5 minutes!

- Squeeze Bottle Lighter Gel
- For use with the B&Co Smokeless BBQ Grill (653014 & 653015)
- Non toxic, eco-friendly and odourless
- Provides a long, clean burn
- No need for electricity or gas
- Childproof cap
- Capacity: 250ml

REFILL
NOT LANDFILL

The UK fails to recycle 16 million single-use bottles everyday.

Plastic bottles and disposable coffee cups litter our streets and oceans. The "Refill. Not Landfill" campaign helps consumers become more aware of the impact single-use plastics have on the environment and our oceans, and encourages them to invest in reusable, sustainable alternative.

WHEN TAKING DOWN YOUR TENT...

- GIVE AIR AN ESCAPE ROUTE**
 Open doors and windows to allow air to escape as the tent is collapsed, this will make rolling and storing easier.
- REMOVE POLES**
 When collapsing sock-corded poles, start near the center to ease the stress on the cord. Push the pole through the pole sleeve, don't pull the poles as this can tear the shock-cord or the tent body.
- FOLD YOUR TENT**
 Fold the tent along its original fold lines. Alternatively, use the length of the tent poles as a guide when folding the tent, they should be the same length before rolling the tent.
- STORE YOUR TENT**
 Place your poles and stakes (in their bags) on the tent body - this will give the tent structure to roll. Slowly and tightly roll the tent so it is compact to fit easily into the storage bag. Store in a cool, dry place.

MyBento

Reusable Collection

REFILL
NOT LANDFILL

Did you know...

The UK fails to recycle **16 million** single-use bottles **everyday.**

On-the-go lifestyles require easily disposable products, such as single-use drinks bottles to keep us hydrated, but the accumulation of these products has led to increasing amounts of plastic pollution.

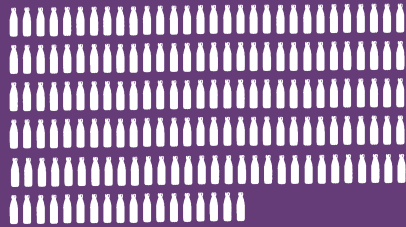

As plastic is composed of major toxic pollutants, it has the potential to leach harmful chemicals into liquids, which can be harmful when consumed and damaging to the environment.

Stay hydrated, protect the Earth's resources and invest in a reusable MyBento water bottle.

MyBento bottles encourage you to stay hydrated throughout the day. The reusable bottle range lets you fill up on the go, anytime, anywhere! Fill and refill with your favourite hot and cold beverages - not just water!

=

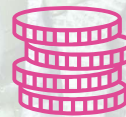

One MyBento bottle is equal to
150 single-use plastic bottles.

Re-use and refill

Stylish and durable, designed for longevity. MyBento bottles are easy to clean and ensure a fresh taste every time you refill.

Purse-friendly

Keep drinks at hand with MyBento; the ideal travel companion. Featuring a leak proof lid and sweat proof design, no spillage or mess guaranteed!

Single-use plastic water bottles cost the consumer 2000 times more than tap water.

Most single-use plastic bottles are non biodegradable and commonly end up in landfill and oceans.

Plastics release toxic chemicals as they decompose, causing pollution and threatening wildlife and sealife.

Eco-friendly

Made from BPA free borosilicate glass and tritan plastic - both recyclable materials which help protect the environment.

MyBento pop cup

Designed and manufactured to offer a more environmentally friendly, sustainable alternative to single-use plastic bottles and hot drinks cups.

Take your collapsible, reusable travel cup with you, wherever you go!

For hot and cold drinks

Collapsible!

Its clever space-saving design means that once your drink is finished, the cup can be collapsed down into a leakproof disc, taking up a fraction of space so that you can enjoy your favourite drinks while on the move.

Simply pop the base out and fill the cup with any hot or cold drink, slip on the heat resistant sleeve and go.

grande

450ml/16oz

The "Grande" cup has a 450ml capacity, equivalent to leading brands "Large" coffee cup. It is a collapsible travel mug with a screw-on drinking lid with stopper to prevent accidental spills, and a removable heat resistant sleeve so the cup can be held comfortably when filled with hot drinks.

Collapsible!

450ml / 16oz

MyBento^{PURE} Glass Bottles

High Quality BOROSILICATE GLASS

A durable, transparent, wide-mouthed bottle made from high quality borosilicate glass.

Borosilicate glass is resistant to heat, harsh chemicals and corrosion. Borosilicate glass has a much higher melting point than ordinary glass and is also resistant to thermal shock, meaning this bottle can withstand sudden changes in temperature without expanding or shattering.

Fill with Hot & Cold Drinks

Fill up on your favourite beverages and stay hydrated throughout the day. Suitable for hot or cold drinks - not just water!

Borosilicate glass is hypoallergenic, lead-free and BPA-free.

Unlike single-use plastic bottles, MyBento bottles do not leach harmful toxins into liquids.

MyBento PURE glass bottles are scratch resistant and dishwasher safe*, ensuring that your favourite drinks bottle stays looking stylish, even after months of use.

*Bottle only

The "Refill, Not Landfill" campaign helps consumers become more aware of the impact single-use plastics have on the environment and our oceans, encouraging them to make positive changes to their own hydration habits by investing in a sustainable, reusable MyBento bottle.

LIGHTING

PROLITES

The lighting featured in the Prolites brand is aimed at any user that needs value for money effective light in any situation, whether that's at home or outdoors.

Being battery operated, they can be used anywhere and you are not restricted by cables that limit the environment they can be operated in. Designed to be energy efficient and low cost to run, the Prolites LED range includes handheld torches, headtorches, lanterns and multi-use LED lights or sets.

Prolites packaging and artwork is designed with the consumer in mind, offering easy to display counter units, to free standing colour boxes, all with key information about battery types, lumen counts, battery burn times and other key product features, empowering your customers to make a choice about which product to buy.

HOW TO CHOOSE YOUR LIGHTING

LUMENS

Lumens (lm) are the measurement of a lighting products brightness output and measured by the amount of light visible to the human eye.

On our Stormforce range of products, the Lumen counts are included on the packaging, enabling quick decision making over how powerful the light will be.

120
LUMENS

Example of icon displayed on packaging.

BEAM RANGE

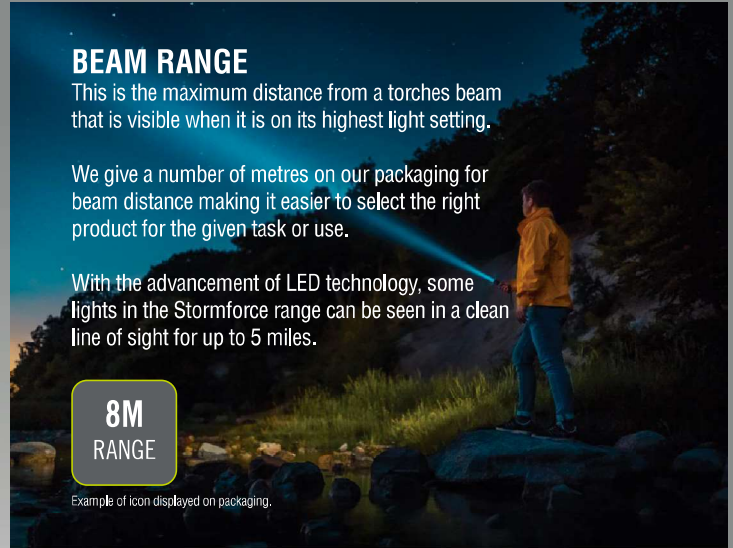

This is the maximum distance from a torches beam that is visible when it is on its highest light setting.

We give a number of metres on our packaging for beam distance making it easier to select the right product for the given task or use.

With the advancement of LED technology, some lights in the Stormforce range can be seen in a clean line of sight for up to 5 miles.

8M
RANGE

Example of icon displayed on packaging.

BURN TIME

We calculate how many continuous usage hours each of our lighting products deliver on one set of batteries. Whether Prolites or Stormforce, we add this information to our packaging, another way for customers to easily identify the best option that suits their individual needs.

The hour rating is based on the products highest light output setting, so would be greatly extended when using the power saving modes where applicable. Unless stated otherwise, we include batteries to ensure the lights can be used straight away. We do not include Alkaline batteries (unless stated) as a lot of our retail customers sell these separately.

Summit always recommends that consumers use Alkaline batteries with our products because the light output can be greater and the battery burn time is greatly extended.

6HR
BURN TIME

Example of icon displayed on packaging.

LEDs use **90% less power** than incandescent bulbs and **60% less power** than CFL bulbs

LIGHT EMITTING DIODES (LEDs)

LEDs are far greener than traditional lighting, helping both domestic and commercial users to lower their carbon footprint, whilst delivering much better light performance than incandescent and CFL bulbs (the first energy saving light bulb). On average, LEDs last much longer and on average can last more than 15 years.

LEDs do not have any mercury content and they produce on average 4 tons less CO2 than incandescent light bulbs, ensuring you can be confident you have the greenest and least pollutant form of light.

Summit LEDs are designed to last in excess of 100 thousand hours, that is 10x the expected life of an old energy saving light bulb (CFL).

LEDs are impact resistant, so when housed in torches, headtorches and lanterns, they make very compact and durable lighting solutions that perform outdoors and in tough environments.

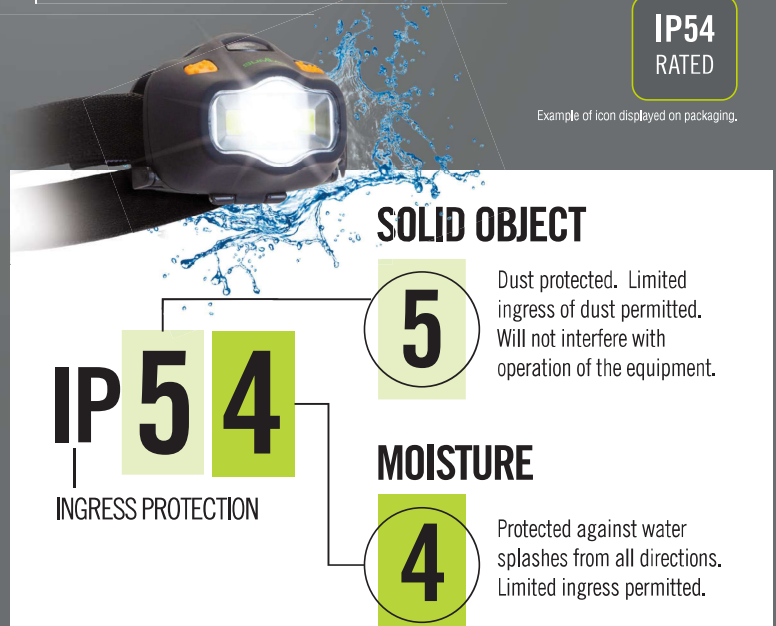

INGRESS PROTECTION 'IP' RATING

'IP' ratings are given to products that give protection against solids (like dust) and liquids (like water) that could have an effect on the use of a product in extreme outdoor conditions, like torrential rain or dust storm.

Summit Prolites and Stormforce products are designed and manufactured to give protection in extreme conditions to the standard of IP54.

A versatile lighting solution, powerful COB lantern torch & spotlight

Torch configuration

Powerful magnet

Fold away hanging hook for lantern configuration

A new innovation of the Orb light, we have integrated a new superbright COB LED in to the light giving off 150 lumens, the light is diffused by the opaque 'bulb' shape housing in Lantern mode.

Then a re-design of the base has allowed us to fit a rotating light fixture, that when you swivel the light, it turns in to a torch/spotlight.

With the new flat base, it will stand for handsfree light, hang via the foldaway hook and be handheld in the torch mode.

- Packaging: Colour Box
- Battery Information: 3 x AAA (included)
- COB lantern, torch & spotlight
- Foldaway hook for lantern configuration
- Powerful magnet on base
- ON/OFF push button
